Antenna Interface Standards Group

AISG v3.0 Subunit Type Compliance Matrix

v2.0

7th February 2019

1. FOREWORD

AISG v3 standard family is divided into the base document and several subunit type standards. AISG v3.0 base document describes the common behaviour of antenna line devices with AISG interfaces and type-specific functionality is defined in subunit type standards. This document describes the subunit type standard version(s) compliance with the base document version(s).

The versioning scheme of this document has two digits, the first being the release version, and the second being the editorial version.

Antenna Interface Standards Group

AISG v3.0 Subunit Type Compliance Matrix

v2.0

7th February 2019

2. Compliance matrices

2.1 RET subunit type standard

Different RET subunit type standard versions are compliant with different AISG v3.0 base standard versions according to table 2.1-1.

	AISG v3.0.0.10			
v3RET3.1.1.7	Compliant			

Table 2.1-1: Compliance table of RET subunit type standard

2.2 ADB subunit type standard

Different ADB subunit type standard versions are compliant with different AISG v3.0 base standard versions according to table 2.2-1.

	AISG v3.0.0.10			
v3ADB3.1.1.6	Compliant			

Table 2.2-1: Compliance table of ADB subunit type standard

2.3 TMA subunit type standard

Different TMA subunit type standard versions are compliant with different AISG v3.0 base standard versions according to table 2.3-1.

	AISG v3.0.0.10			
v3TMA3.0.0.6	Compliant			
v3TMA3.0.1.0	Compliant			

Table 2.3-1: Compliance table of TMA subunit type standard
